## Botox®

Botox® is a purified protein that is injected into the muscle leading to temporary muscular relaxation. It is a quick, safe and effective way to smooth and soften facial wrinkles and is virtually painless. Most common areas treated are crowsfeet, frown lines and forehead lines. Results will be seen in 2-14 days and last 3-6 months. Treatment needs to be repeated to maintain results.

1 area	£200
2 areas	£250
3 areas	£300
Extra areas	£50

## Hyperhydrosis

Botox® injections can be used in the armpit area to inactivate the sweat glands and hence reduce excessive sweating. Easy and virtually painless procedure that can last up to 9 months.

£450

## Lip Enhancement

Fillers can be injected into the lips and lip borders to add volume and definition. This makes them plumper and more luscious.

from £350

## Hyaluronic Acid Fillers

Hyaluronic acid is a naturally occurring substance in the face. It helps the skin stay supple and firm and helps maintain facial moisture. As we age, hyaluronic acid levels deplete (along with collagen and elastin) leaving the skin saggy and wrinkled. Facial fillers are used to restore facial volume and smooth away the deep lines that develop over time.

Restylane	1 syringe	£220
Restylane	2 syringe	£340
Juvederm 3	1 syringe	£240
Juvederm 3	2 syringes	£360
Belotero basic	1 syringe	£240
Belotero soft	1 syringe	£260

## Chemical peels

Chemical peels work by peeling off or removing the uppermost redundant layers of the skin or epidermis. The body then replaces the top layers of skin with healthier and younger looking skin. An excellent treatment for sun damage, acne, age spots, large pores and fine wrinkles. Different conditions require different depth of chemical peel.

Glycolic Acid peel	£125
Easy TCA peel (course of 4)	£650
ICP peel (for darker skin types) (single treatment)	£500

Gift vouchers are available.
